

## **ABA President's Address** **Game Theory in Burn Care**

**Saturday, November 10, 2018**  
**9:00 – 9:30 am**

**Author:**

Steven E. Wolf, MD, FACS  
President, American Burn Association  
Chief of Staff  
Shriners' Hospitals for Children  
Galveston, TX

**Objectives:**

Upon completion of the lecture, attendees should be better prepared to:

- Assess strategic interactions in complex situations.
- Grasp game theory as it relates to burn care delivery.

**Abstract:**

Game Theory is a new field in economics that assesses strategic interactions between actors in complex situations. This talk will 'introduce' game theory as it relates to burn care delivery. Who are the players, what are the rules, and what are the payoffs? In particular, how can these principles be used to secure the best outcomes for our patients?
