A Better Way to See Patients

Akos Connect is a revolutionary telehealth platform that allows physicians to diagnose and treat patients from their smartphone, tablet or desktop. With flexible, 24/7 access, our cloud based, HIPAA-compliant platform allows remote access so physicians can virtually consult with patients anytime, anywhere.

Extend Your Reach

Expand your geographical footprint to patients in rural or underserved areas that you would otherwise not be able treat. Telehealth is an effective approach for doctors across the country to provide care for patients outside their geographical area.

Stay Healthy

Practicing through virtual care eliminates the risk of exposure to infectious diseases, illnesses or conditions from your patients.

Turnkey Implementation

Akos Connect makes it simple to join the telehealth movement. Our turnkey implementation can have you virtually meeting with your patients in as little as 24 hours.

## The Akos Connect Advantage

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Secure</strong></td>
<td>As a HIPAA-compliant telehealth provider, we implement the highest levels of security and encryption protocols to assure that data integrity and privacy is maintained.</td>
</tr>
<tr>
<td><strong>No Downloads</strong></td>
<td>Simply share your personal weblink with your patient. No unique software, apps or downloads required.</td>
</tr>
<tr>
<td><strong>Multi-Party</strong></td>
<td>Add other members to the consultation such as family members, specialists, or translators. Up to 64 members may join the same virtual exam room.</td>
</tr>
<tr>
<td><strong>Screen Share</strong></td>
<td>Our screen share option gives you the ability to share important information like x-rays and test results during the consultation.</td>
</tr>
<tr>
<td><strong>High Quality Video</strong></td>
<td>Our high-quality HD Video and audio enables you and your patient to have the best experience possible.</td>
</tr>
<tr>
<td><strong>Device Agnostic</strong></td>
<td>Compatible with any smart device, laptop or desktop. Also works cross-platform on iOS and Android.</td>
</tr>
<tr>
<td><strong>Recorded Sessions</strong></td>
<td>Each session is recorded and securely stored for your convenience to review later and keep for your records.</td>
</tr>
<tr>
<td><strong>Patient Queue</strong></td>
<td>View the patients who have checked into the virtual waiting room.</td>
</tr>
